
EXPERIENCE

Co-Creator, Software Engineer	Dendro	February 2021 - Present
--------------------------------------	---------------	--------------------------------

- Collaborated remotely to architect, design, and implement the core pipeline able to extract, transform, and load (ETL) data in near-real-time at scale.
- Led implementation and deployment of the serverless AWS services used in the pipeline.
- Transformed gathered metrics using time-series analysis and visualized them using charts.

Co-Creator, Software Engineer	BridgeAPI	August 2020 – January 2021
--------------------------------------	------------------	-----------------------------------

- Designed and implemented core functionality & database, ensuring data integrity and proper use of indexes.
- Created lo-fi & hi-fi mockups to facilitate planning and implementation of user interface & frontend.
- Implemented frontend using React with Next.js

Co-Creator, Software Engineer	RB Implementations LLC	May 2020 – August 2020
--------------------------------------	-------------------------------	-------------------------------

- Implemented and delivered a dynamic PDF report using Puppeteer for the results of the patient's SARS-CoV-2 serology test.
- Provided logic/mapping/rendering able to handle five possible test results calculated from, and displaying, dozens of analytes.
- Positively affected thousands of people in the San Diego area by empowering them to view their results from their home's comfort on the day of launch.

Software Engineer	Self-Employed	July 2017 - May 2020
--------------------------	----------------------	-----------------------------

- Launched an eCommerce platform allowing merchants to create a personal store & provided an interface for Stripe's onboarding process for payments (Ruby on Rails, React, Express, Stripe & Paypal API, Amazon Web Services).
- RequestBean - A database-backed application for receiving and debugging webhooks (Node.js, PostgreSQL, Websockets).
- Jello - Trello-like collaboration app (MongoDB, Node.js/Express, React/Redux).
- Airline Routes- Airline routing application dynamically displaying over 1,000 filterable routes (Node.js, React).

EDUCATION

Las Cruces, NM	New Mexico State University	Fall 2014 – May 2015
-----------------------	------------------------------------	-----------------------------

- Attended the Conroy Honors College.
- Invited and accepted into the National Society Of Collegiate Scholars.
- Phi Eta Sigma candidate, the oldest freshman honor society in the country.

Languages and Technologies

- **Languages** - Ruby, Typescript, Node.js, SQL, NoSQL, HTML, CSS, Golang
- **Frameworks** - Ruby on Rails, Express.js, React.js, Redux, Bootstrap, Next.js, Handlebars, jQuery, Sinatra, Erb
- **Cloud** - Amazon Web Services (EC2, IAM, Kinesis Data Firehose, S3, Lambda, Lambda@Edge, Timestream, SDK), Heroku
- **Technologies** - REST APIs, Git/GitHub, HTTP, JSON Web Token, PostgreSQL, MongoDB, Redis, Sidekiq, Linux
